

[Please see Page No.8, Point No.17 of the scheme]

ANNEXURE – I: RESEARCH PROPOSAL FORMAT

Other than the mandatory information accompanying each application, candidates should submit their research proposal in two parts:

A) Abstract of the research proposal (about 300 words).

B) Detailed research proposal (about 3000 words). An indicative outline for the detailed research proposal is given below:

- 1. Title:** The research proposal should have a clear, meaningful and concise title reflecting the scope of the investigation.
- 2. Introduction:** The research proposal should begin by clearly stating the research problem to be investigated in the light of its theoretical and/or empirical context in the relevant area.
- 3. Objectives of the Study:** The general aim of the study as well as its specific objectives should be clearly stated in the proposal.
- 4. Research Questions or Hypotheses:** Given the conceptual framework and the specification of dimension, the specific questions to be answered through the proposed research should be sharply formulated. In the case of an explanatory research design, specification of variables and positing of relationship among them through specific hypotheses must form a part of the research proposal.
- 5. Review of Literature (National & International):** The proposal should summarize the current status of research in the area and major findings, including the researcher's own work in the area. Existing empirical findings may also be discussed. The overview should clearly demonstrate the relevance as well as inadequacy of existing findings or approaches and provide a rationale for the proposed study.
- 6. Research Methodology:** The researcher must describe in detail (a) the scope and coverage of her/his study; (b) approach and methodology with adequate justification and Timeline. Emphasis should be given to bringing out innovativeness in approaches proposed to be followed. The detailing of the methodology may include research design, data to be collected and empirical and analytical methods to be used. The description of the methodology must be clearly linked to the aims of the research and the research questions/hypotheses of the study.
- 7. Relevance and Anticipated Outcomes:** The proposal should include a statement on the relevance of the study and the anticipated outcomes. The proposed research work should be fulfilling the regulatory requirement of Ayurveda and should have an impact

on advancing the understanding and application of existing knowledge of Ayurveda. It should bring out the significance of the research problem, the contribution which the proposed study is expected to make to theory and to methodology as well as its practical importance to society and policy making. It should also describe the proposed outputs from the study (Books, research papers, occasional papers with themes etc.)

- 8. Tentative Cauterization (Summary):** Cauterization (summary) should be clearly spelt out in the research proposal.
- 9. Bibliography, References and Citations:** should be prepared in Vancouver referencing style.
